

Mukamil Pasha M

SOC Analyst | SIEM Monitoring | Incident Detection & Threat Analysis

India | Open to 24x7 Shift-Based SOC Operations
Email: mukamilpasha5@gmail.com
LinkedIn: linkedin.com/in/mukamilM

Professional Summary

Entry-level SOC Analyst with hands-on experience in SIEM monitoring, log analysis, alert triage, and incident investigation within lab-based SOC environments. Skilled in analyzing Windows and Linux logs, investigating suspicious authentication activity, detecting malicious behavior patterns, and mapping threats to the MITRE ATT&CK framework. Familiar with Splunk, ELK Stack, Sysmon telemetry, IOC analysis, and SOC escalation workflows. Strong understanding of networking fundamentals, attack techniques, and security operations in 24x7 SOC environments.

Core SOC Skills

- SIEM Monitoring & Alert Triage
- Incident Detection & Escalation
- Log Analysis (Windows/Linux)
- Splunk SPL Basics
- ELK Stack Monitoring
- MITRE ATT&CK; Mapping
- IOC Analysis & Enrichment
- Windows Event Log Analysis
- Sysmon Log Investigation
- False Positive Reduction
- Threat Hunting Fundamentals
- Phishing & Malware Investigation Basics
- Network Traffic Analysis
- Incident Documentation & Reporting

Technical Skills

Category	Skills
SIEM & Security Tools	Splunk, ELK Stack, Wireshark, Sysmon, VirusTotal, AbuseIPDB
Operating Systems	Windows, Linux
Networking	TCP/IP, DNS, HTTP/HTTPS, Packet Analysis, Network Log Investigation
Security Concepts	MITRE ATT&CK, IOC Analysis, Brute Force Detection, PowerShell Activity Analysis, Hashing
Reporting	Incident Reporting, Alert Tracking, MS Excel, MS Word

SOC & Incident Response Lab Experience

- Monitored security alerts in simulated SOC environments using Splunk and ELK Stack
- Investigated failed authentication attempts using Windows Security Event Logs (Event ID 4625) to identify brute-force activity
- Analyzed suspicious PowerShell execution and process creation events using Sysmon logs
- Correlated multiple log sources to validate malicious activity and reduce false positives
- Performed IOC enrichment using VirusTotal and AbuseIPDB for suspicious IP addresses and file hashes
- Mapped attack behavior to MITRE ATT&CK; techniques for structured incident classification
- Created incident investigation reports containing attack timeline, indicators, impact analysis, and escalation details

Projects

SOC Home Lab Setup

- Built a personal SOC lab environment using Windows, Linux, Splunk, Sysmon, and Kali Linux
- Generated simulated attack activity for detection and investigation practice
- Configured centralized log collection and monitored suspicious authentication events

Threat Detection using Splunk

- Developed basic SPL queries to detect failed logins, suspicious PowerShell commands, and abnormal process activity
- Investigated simulated attack scenarios and documented detection methodology

Education

Bachelor of Computer Applications (BCA) – Final Year

Certifications

- Preparing for CompTIA Security+
- Splunk Fundamentals 1 (Planned)
- SC-900 Microsoft Security Fundamentals (Planned)

Availability

Available for rotational shifts, night shifts, and 24×7 SOC operations. Prepared to work in high-pressure incident response environments and follow SOC escalation procedures.
